## **Atlantis reborn**

Smiled reminiscing cry  
Healed pouring blood  
Damaged brain fried  
It's now, the flood

Aqua pouring wisdom  
Dead soul in a rooster cry  
Ancient ancestors in spiraled flight  
Teach that divide is only to unite

Yawning...  
Channeling

They all revealed the last scroll  
Breake through I AM control

Is it because how I see it all!?  
Who are you to weight my soul?  
Who Am I to be controlled?  
Who are we, Atlantis reborn!?

## **AEIOU**

Embraced myself instead of the sky  
Obeyed myself with no need to lie  
Cleansed myself knowing how and why  
Outlived myself instead of thy

## **A E I O U**

Because I know thy  
Already had the sky  
Asked so much why  
Born to burn and daily die

## **Soul in control**

Footsteps like ghosts dance  
Veiled eyes think they know how the body got  
rotten to the core  
Oh, poor reptile brains don't deny the soul  
It has all the rights to hold you under control

**Be - at**

Beat

Green yard fence glowing on shadows  
White tree firstborns taken stars place  
Black birds, free high fly channeling  
Blue hole shining bright, oh so blind

Rooster

Be-at

Jazz

Sun

Saint Elsewhere beat on butterfly path  
Shine you mole, shine

## **Kontrol**

I invoke the spirit that has authority on this  
Cause she cursed more than a voodoo witch  
And all of them obeyed under the lie  
Laughed at my blood while I died

I stood up pious and smiled  
Darkness seemed pleasant but yet so dangerous  
Yawning demons from sold souls  
Where it has lost all controls

Dark then Bright  
Black and Light  
All in One  
One in All

Control  
Kontrol

## **All seeing I**

Temptations are not daily, but unexistable.  
Desires too.  
Crawling for them is daily.  
Pure illusion.

When the Eye is unveiled,  
the mirror is clear,  
not broken, not yet,  
but upside down.

See it however you want  
Unwrap and roll it back  
Not in nor out  
Just SEE It

As It is,  
One Eye that seize us all  
No need to determine it  
No need to obtain control  
Just unveil It and look!  
It is IT

## **Oh, sunny**

Animal out of zoo being utterly gnarly  
My baby just cares for me, oh how funny  
Kicking worse than Bucephal when it's sunny  
Trip me again,cum humping like a bunny

## Rendezvous

Holes - that deep, that your death is nowhere  
near to the depth of it  
Flame brighter than your shining eyes  
Bluish nothingness...  
Diving into the Book of Life without rejecting  
Her Majesty.

Mmmmmmm...  
A A E AE AEI AEIOU AEIOUmmm

Her Majesty, with Her well knowed title Death  
has been unveiled.  
Not raped, not this time. Nor again.  
Maybe never again if it's coinciding with the  
Will.  
And inspiring, tonight she may not hide. Neither  
to veil IT again.

Deceiving Deceiver,  
caught in trap so pleasant and pure,  
equivalent to her shining cure

Death like friend,  
Light so bright  
That was not you,  
Can't kill me twice

Breathe, Death  
I Love You  
Always did  
Raping You was the purest thing I've ever done

Her holy vibration has been synced with the  
Eternal illusion.  
Everlasting, unchangable, welcomed as baby in  
Virgin's womb.

I got the keys, so I can clean the tomb

## Oh, Grace

Oh, divine silence...  
Grace embroidered in spiral  
Sets of eyes embraced  
When word is sufficient  
When minds are calm  
When veil is expelled  
When hearts are warm  
Then..  
She shines with no speaking  
I'm silent full with meaning  
She looks deep in the Eternal  
Rearranging me, showing I AM  
I smile, oh Grace!

## Overcum

When the moon and the stars and the sky  
collapse

I Am the Sun to make the progress  
While asleep tear of the gnarly veil  
I burn and rise, invoke and hail

The dark muse is my black night  
And she will see the white blind light  
Where the Eye that seize us all is us  
And we as snakes embrace the Cross

Divide and Kill  
Sublime and Heal

Overcome

## Bliss & Bless

No comment is worse than a comment  
Ignorance is not a bliss  
The ladder leads down, dellusioned moments  
God Bless...

Just as the Word was cursed with two meanings

When you are asleep then you are alive  
In the short run is back in all directions  
When you wake up you start to die  
White blind days and black mute nights

Just as we dive in the stars instead to wind down  
the road  
Pious without shadow, hearts from a gold  
Rolling, melting in the cold  
It's warm...

## **Bam, bang, bad**

All those moments ...

When u hear it...

Feel it...

Want it...

Dream bout it!

Badly!

Even if U want, U cannot b sad!

Those invisible drums in ya head echoing

Bam bam bam!

Numbed.

Bam, bang, bad.

Till when? When? When?

Strange!?

Delirious roused to anger

Dirty sheets between the teeth

Possessed by hunger

Begging to breathe

Missing someone makes u so, so bad!

Wandering...

And wondering...

Breathe.

Weird.

Just asking...

Maybe.

What if We All were actually Dead!?

Death smiled.

## Axiom

Before you crucify, wound, or otherwise injure someone without connections, it might be wise to remember that your victim might suddenly find himself with connections, and thus you might find yourself the recipient of wrathful feedback.

Morality, reputation, rules ?  
He said that the Law is to avoid sin?  
As Above, so Below is the real deal.  
If IT is unreal, feel free to come and explain it to me.

Five sensed blinded by an eternal veil

Try and test me one more time, gonna make u see it bright.  
Cause you just look, zero point made you blind.  
Not all souls but only the pious ones are divine.  
For when u r weak, then u r strong, just align..

Unveil the tend to rationalize...

## **My, oh mine**

Mad karma flipping round  
Hungry trip in a daylight  
Her juices melting mouth  
Cosmic movie under ground

Witch behind a smile so contagious  
Drown in death, mine all mine

Evil spell poisoned and dangerous  
Burn in hell, my oh my

We are all on the dark side  
It's just desires that seem light

We are all deep under ground  
Thank the Sun for that shine

Chanting...

All mine!  
My, oh my!

## Let it be

Girl, changed my mind  
Killed it, no more veil on me  
Woman, u are so fine  
Teached me to let it be

.

## **Cause this is fucked up**

Beating since ancient times  
Beat on the sea  
Beat on the mountain  
Beat back

Back, going back in all directions  
Beat up there, in there  
Just to set me free  
Bird in a cage

Leda awaits the swan

Bird of prey flies high  
Beating for the moon  
Crawling for the sun  
Dying in our night

Die swan, die

## Grow

Grapevine as a gift  
Flesh to abuse  
Blood for thirst  
Bread by noon

I've been there  
I am still here  
I'll go again  
I am near

Cause I don't change  
I just grow  
And when I burn  
I thrill old soul

## Coincide

Coincide two and one  
Baby snake changed my mind  
To conceive that this is not light  
That illusion is the night

When awake then you die  
Sleep, my love  
Learn to die instead to cry  
And then you'll fly

Just as when you've been alive...

## **Practice what you preach**

That ain't madness  
Even though Alice is bad  
& I loved it all, so sad  
Before you came here  
Oh, how you've been near  
Preach a little more about fear

## **P(l)ayback**

Not because your hair is curly  
Neither though my vision is blurry  
All this hurry was just a setup  
Let the games begin, got a backup

Lover doll, let's ball  
Got your back, baby  
Calm your soul  
You've already paid me

## 3D

If they have let the real ones in  
It wouldn't be honest to say it is a sin  
Getting down is the fastest way for going up  
Higher than what is here

3d

We are all in a corpus hermeticum  
Overcome

**Uvi!**

Love thee

Watch how I love thee

Sold my soul for “we”

Ooh – wee

Uvi!

U la la

Voila!

All that stress is no less than jazz

Just a test

Buletproof vest

Here is the button you want to press

## **Colorful mess**

Miss, why I can't rhyme you with bliss?  
The darkness gotta be blessed  
Cause, what really light is?  
Bliss & bless or colorful mess?

(No, I'm not Rudolph Hess!)

## Purgatorio

Why no one joins me in the divine play?  
Maybe because I'm cursed from rays?  
Veiled eyes or burned all seeing I?  
Who will stab the all seeing eye?

The sky cried blood eons, enough  
Earth shivers from rays that tough  
So your eye is tilted ages ago  
Before being born, you've sold your soul

Now you shine, mole!

Concentrated heat from a ball so huge  
Way bigger than that skull of yours  
Wild cosmic sun rays piercing through it all  
Burning bones, ashes and dust  
Selling soul is not always a must  
Now you are busted  
It was all a bluff

Puff!

## Indigo

Yeah, we are both kids  
Even though you are younger than me  
I feel your soul's age  
Kids locked in same cage

## Demian

He ain't you,  
Fooled you – fool!  
Who can deceive the deceiver?  
Not only when it's bark on the moon she barks!  
Now, who got the mark?

## **I am you and what I see is me**

Bought your soul again  
See, you ain't the one to blame  
For the weakness of the game  
Through her eye appeared I  
Divided, divided from it all  
Thank you Eye, keep I under control

## **That's why**

From two goat horns  
I've conceived a bow  
That's why you mourn  
That's why I glow  
From a light got arrow  
Darkness was borrowed  
That's why I  
That's why you

## **Murder**

Stupid Cupid  
Plays childishly  
Cause he got the bow  
And sky sharpened his arrow  
But, I've killed him  
Because my road is narrow  
It hurts to set you free  
But you will never follow me  
Told you not to play stupid  
It was just a poor boy I've killed  
They named him Cupid  
Don't play stupid  
Cause I've killed Cupid

## **Break on through**

Breaking solo through the edge  
Dead, bruised and numb  
Heart stolen, soul already sold  
Gonna kill, heal and reborn

## **Girl, we couldn't get much higher**

This insane desire has set our funeral pyre  
Got my gnarly own, but want your bloody fire  
Strange for thy  
Lost all mine, oh my  
Opposite of two is gnarly me and bloody you  
Together we are all in one, moon and sun

## **Apocalypse now**

Rage born of delusions breaks the fragile mind  
Seeking what can't be found in her weary eyes  
How great stupidity is, deceiving me all the time  
Though she got enough heat to melt this ice

Deceiver being deceived from his sad heart  
Killer out on bail, trying to overcome  
Angel so mad, fake grace torned him apart  
Need a creation, a brand new one

No reflection in the mirror, or I'm blind  
Gabriel, blow that horn and let it be  
There, where eternal wisdom can be found  
I know god personally, he let's me call him – me

& it was all mine, I've lost it – that's why now I  
shine

**Hello, dear**

Now we can talk, loud as you wish  
While you scream in silence and I moan in bliss

How have you been, dear  
It is quite clear that you feared

Miss

Missing you was hollow  
Since you've been always here  
Present in the glowing shadows  
We've been there, safe from harm  
Yet so near  
Oh, how rare you are  
Want you again  
Up, down and all around

## **I don't know**

I know some things that you don't know  
The more you know, the more you know you  
don't know  
Now, when all is one and one is all  
We don't know how, nor why  
Are we alive  
You don't know  
Someone has new arrow and bow  
To pierce through all your vows  
Utterly meaningless, as it is all  
We know that we don't know

## **I whisper in your dreams**

While you sleep  
Or at least trying to  
It's not about beauty and the beast  
Neither about all of our friends feasts  
Actually, it is not – this is not a story  
More something like a glory  
So pure without any need to be proud  
Quite sure that what burned were our doubts  
Now is not the time to be worried  
Cause here it is  
Everything is borrowed  
Every single thing, except love  
As below, so above  
Mirrored image  
As within, so without  
Love is what it's all about  
Now burn your deepest doubts

## **Solaris & Luna**

In between these rhymes, the tide rises

Poor mice, she has a flower inside

Lotus

Sol tu

Anul

Nula

Sol

Luna

Solaris et Luna

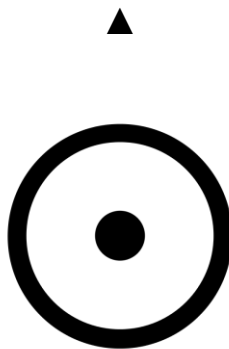

## Imagine

Imagine how would hell be  
No heaven, just darkness and me  
Imagine NOW  
One army  
One government  
And the Eye on top of it all  
As cherry on a cake  
Imagine that all the children will awake  
I hope some day the Eye will  
You may say I'm a dreamer  
But, oh baby I'm not  
You can just imagine all that mess  
While I thrive to provide you with cosmic bless

Two years ago, he managed to initiate the first archaeo-acoustic research in Republic of Macedonia, after which several scientific papers were published in international scientific literature. This is his fifth book, first one in English, with 37 short poems inspired by love, death, sex, occult and love, written in the past five years. The author has prepared seven different types of books with prose, poetry, scientific texts, translations from old books and tourist manuals, which are in preparation for publishing.
